Summary

MCA graduate applying for a MERN stack trainee role. Built three web applications end to end, covering responsive front-end interfaces, server-side logic and relational database design, including a financial management system with secure real-time chat between users and advisors. Works across HTML, CSS, Bootstrap, PHP, Java, Python and MySQL, with object-oriented programming, Git version control and debugging across the full request path. Looking to apply that full-stack foundation to JavaScript, React and Node.js development.

Skills

Web Development: HTML, CSS, Bootstrap, responsive interfaces

Back-End and Databases: PHP, MySQL, relational schema design

Programming: Java, Python, SQL, object-oriented programming (OOP)

Practices: debugging, problem solving, version control

Tools: Git, GitHub

Projects

Money Morph: Financial Management System

- Built a financial management system end to end: user-facing interface, server-side logic and MySQL data layer.
- Implemented secure real-time chat so users could consult financial advisors without leaving the application.
- Supported personalised financial planning and goal tracking across the application.
- Tech: PHP, MySQL, HTML, CSS, Bootstrap.

Exam Seat Allocation System

- Built a web-based system that allocates examination seats automatically, cutting the manual effort behind seat management.
- Tech: PHP, HTML, CSS, Bootstrap.

Craft Connect

- Built an online platform for women to sell handmade products, with video content for sharing skills and tutorials.
- Tech: PHP, HTML, CSS, Bootstrap.

Education

MCA (Master of Computer Applications), College of Engineering Chengannur, APJ Abdul Kalam Technological University, Aug 2024–May 2026

BCA (Bachelor of Computer Applications), College of Applied Science Adoor, University of Kerala, Nov 2020–May 2023
